MEPCLEAN TANK CLEANING AND FILTRATION SYSTEMS

Mepclean, a modern technology product with advanced features, is a high-capacity portable device designed to clean your fuel tanks efficiently while providing maximum gain in fuel recycling with its filtering system that makes a difference to its competitors. With its 4-stage filtration system, Mepclean separates pollution and water from the fuel in the most efficient way and ensures that fuel is not consumed excessively during tank cleaning. Instant pressure monitoring and filter occupancy rates can be easily done with the manometers on the device.

Features:

130 Micron Wire Filter
10 Micron Bag Filter
1 Micron Bag Filter
5 Micron Water Filter
Control Panel
ODM 48 EX Mechanical Fuel Meter
Ground Wire
Ex-Proof, Air Fuel Pump
Conditioner

Product No TDR2000001212
