DIESELBOY 222 FUEL PUMP

Fuel is at the top of the operational expenses of the business. Developed with Mitess's more than 45 years of experience in the sector and MLB Group's superior technology and engineering know-how, DIESELBOY is specially produced to quickly complete the fuel supply of giant trucks. Thanks to its RS 485 output, it can work compatible with fuel automation systems. It is not suitable for fuel trade. "IT CANNOT BE USED FOR BUYING AND SELLING". Please call for different efficiency and equipment options.
