DIESELBOY MECHANICAL FUEL PUMP

Fuel is at the top of the operational expenses of the business. Developed with Mites' more than 45 years of experience in the sector and MLB Group's superior technology and engineering know-how, "Dieselboy Mechanical Fuel Pump" is specially produced with a mechanical counter for trouble-free use in aboveground and underground fuel tanks. Dieselboy Basic models should be preferred for electronic models, or Dieselboy 111 or 222 models should be preferred for use in underground tanks. It is not suitable for fuel trade. "IT CANNOT BE USED FOR BUYING AND SELLING". Please call for different efficiency and equipment options.

Model:	111 - 1 Product, 1 Gun, 1 Yield - With Mechanical Numbering
Flow (QMin-QMax):	5-50 L/min (5-90 L/min - 10-130 L/min options are optional)
Ambient Operating Temperature:	-25°C / +55°C
Type:	Suction (Submersible option optional)
Weight:	70 Kg
Dimension (LxWxD):	1350×550×500mm
Steam Recycling:	Optional
Certificates:	N/A

Product No MTS1000000166
