MITES FOLDABLE WOODEN FUEL MEASURING STICK - 2 LAYER 3500 MM

MITES FOLDABLE MEASURING STICK It is used to measure the fuel level in fuel tanks. It is inserted straight into the tank until it touches the bottom of the tank. Total is 3.5 meters. The measurement at the fuel contact point of the measuring rod shows how many centimeters of fuel are in the tank. Additionally, if SUBUL FUEL WATER DETECTION PASTE is used during use, you can also see the amount of water in the tank (if any). For detailed information about SUBUL IN-FUEL WATER DETECTION PASTE, you can visit the page on our website.
