LOCWIZ FUEL PUMP AND TANK AUTOMATION

There is no reason to wait, Mites offers the most suitable solution for you, Locwiz Fuel Automation System. Locwiz Fuel Automation System, derived from the words Local and Wizard, is used in construction sites, logistics companies, military, municipalities, etc. that use fuel oil with 1 pump and 1 tank. It provides fuel control of the facilities. You can access instant pump control and fuel data in the tank via the internet, no matter where you are. You can control fuel consumption by refueling your vehicles 24/7 with either a vehicle recognition system or card reader system options.

Pump Automation:	Standard
Tank Automation:	Optional
Vehicle Identification System:	Optional
