OILPORT 18 LT ROTARY OIL PUMP

Designed for amateur and semi-professional use, this product is specially produced for use in places where thin oil usage is intense. Different types are also available upon request. Our model, produced as standard, has an 18-liter carrying bucket with wheels, a rotating manual thin oil pump that transfers 250 liters in 1 turn, a 1.5 meter oil hose and a hook pipe type transfer head at the end of the hose. This product is used for the lubrication of auto maintenance services, vehicles and work machines such as buses and trucks. Thanks to its wheels and portability, it is portable and can be used until the oil at the bottom. It provides clean oil transfer thanks to the filter at the end of the oil pump's suction pipe.
