YAĞVER 58 TRIGGER OIL GUN WITH ELECTRONIC COUNTER

It is indispensable equipment for garages and workshops that use mineral oil. Our counter, which works with 2 AAA type batteries, has two separate resettable counters that show the instantaneous data and non-resettable counters that show the total data. Thanks to the trigger gun, control is completely in the user's hands. It provides 0.5% accuracy with a maximum working pressure of 75 Bar and a throughput capacity of 30 lt/min. It can be used in different oil types with easy calibration. The counter works on the oval gear principle. It can be used for years without any problems, provided that the oil passing through it is clean and not hot and the battery used is of good quality AAA class.

Working Pressure:	75 Bar
Accuracy:	0.5%
Yield:	30 L/Min.
Gun Type:	Triggered
Protection Class:	IP 65
Battery Type:	2 AAA
Units of Measurement that can be	Liter, US Gallon, Imperial Gallon

Product No TDR2000001184
