MTS-809 TANKER DISCHARGE ADAPTER - 4x3 REDUCER ADAPTER

The wide end of our product, produced for fuel tankers, is connected to the bottom discharge API valve and the other end is connected to the composite discharge hose. It provides safe filling thanks to its locking mechanism. Its inner seal is suitable for diesel and gasoline-derived fuels.

Features:

Design suitable for easy and fast locking,
Long-lasting and durable structure made of alloy aluminum material,
Product conforming to ADR 4.3.4.1.1,
Tested with 3 bars.

Product No: MTS1000000257
