FUEL FILTER WITH CLEANABLE CARTRIDGE

The filter with a transparent chamber and removable cartridge is designed to be installed at the inlet of your fuel pump. It also has water absorbent properties. The amount of contamination or water in the fuel can be seen immediately in the transparent container. Any water or impurities can be removed with a valve placed at the bottom of the container.

Filtering capacity:	30 µm
Flow rate:	70 - 150 l/min
Working pressure:	3.5 bar
Burst pressure:	10 bars

Product No TDR2000000976
