DIESELPORT SAHRA FUEL TANK & PUMP SET WITH TRAILER

These trailer type fuel tankers are designed for fuel supply, especially in difficult field conditions, and are generally produced according to customer demands within the scope of special projects. The sizes of tankers can vary from 500 liters to 5000 liters, and the tank, chassis and pump used in them can be customized according to customer needs. In this way, special solutions are offered that fully meet the needs of customers. Trailer type fuel tankers are generally transported by pulling vehicles and are easy to use, especially in off-road conditions.
