TRANSET 70 DC DIESEL TRANSFER PUMP

This pump is designed as a product that can be used in many sectors such as automotive, agriculture, mining and construction. Transet 70 DC has 24 Volt and 12 Volt engine options and can be operated with a quality battery. The product can operate with an efficiency of 70 Lt/Min, and this efficiency may vary depending on factors such as hose length and battery amperage. Since DC motors use coal type motors, they are not very suitable for continuous use, but thanks to the cooling fan behind them, they are very efficient compared to other DC motors.

Entry-Exit:	1"
Capacity:	70 Lt/Min.
Engine:	12 V DC, 550 Watt, 2850 Dv/Min., Thermal Protection
Maximum Suction:	With 1" installation, 1 meter from the ground and 2 meters from the horizontal
Pump System:	Crawler
Filter:	Cleanable 350 micron steel wire filter coupled to the pump
By-Pass System:	Yes
Weight:	4.5 Kg.
Dimension (LxWxD):	160X230X160

Product No TDR2000001039
