TRANSET 35 12/24 V DC MOTOR TRANSFER PUMP

This pump is designed as a product that can be used in many sectors such as automotive, agriculture, mining and construction. Transet 35 12/24 V DC has the ability to work with both 12 Volt and 24 Volt and can be operated with a quality battery. The product can operate at different flow rates in accordance with the voltage supply. This efficiency may vary depending on factors such as hose length and battery amperage. Since DC motors use coal type motors, they are not very suitable for continuous use. If you have an AC type energy source, we recommend that you look for a suitable motor.

Entry-Exit:	1"
Capacity:	40-70 L/Min.
Engine:	12 V DC, 300 Watt, 2850 Dv/Min., Thermal Protection
Maximum Suction:	With 1" installation, 1 meter from the ground and 2 meters from the horizontal
Pump System:	Crawler
Filter:	Cleanable 350 micron steel wire filter coupled to the pump
By-Pass System:	Yes
Weight:	2.5 Kg.
Dimension (LxWxD):	160X240X160

Product No TDR2000001153
