OILPORT A4 BARREL TYPE GREASE PUMP

Designed for amateur and semi-professional use, this product is specially produced for use in places where grease is needed. Different types are also available upon request. In our standard A4 model, it allows the grease to be transferred by suction from the barrel. There is no hose, gun joint, etc. in this product. This product is used for the lubrication of auto maintenance services, vehicles and work machines such as buses and trucks. It is portable as it can be moved to another barrel when the oil in the barrel runs out and can be used until the oil at the bottom. It provides clean oil transfer thanks to the filter at the end of the grease pump's suction pipe.

Working Pressure:	6-8 Bar
Compression Ratio:	1/70
Air Consumption:	85 L/Min.
Yield:	0.9 Kg/Min.
Grease Capacity:	Barrel
Hose Length:	Max. 50 meters
Hose Type:	1/4 R2
Weight:	6.5 Kg.
Packaged Weight:	7 Kg.
Packaging Dimension (LxWxD):	170x140x115mm
